WEAR PARTS AND ATTACHMENTS

## CUSTOMIZED WEAR PACKAGES TO ENHANCE YOUR OPERATION

Enstruc front shovel buckets and backhoe buckets are custom-engineered for large hydraulic mining excavators. Specifically designed with the highest performance, tear-out and break-out forces, every mining bucket is customized with a wear package to suit your needs for durability and performance.

Our engineers have carefully developed the optimum shape, dimensions and geometry to reach the highest possible penetration forces while keeping the working pressures of hydraulic cylinders well below maximum pressures. All our buckets are thoroughly inspected by ultrasonic procedures to ensure they meet the highest standards.

We are happy to support you with selecting the right size, weight and wear package for your application.
